

# ENVIRONMENT POLICY

MEO understands the potential environmental impacts of our operations and we are dedicated to comply with required environmental laws, regulations and permits.

All operational practices shall be performed whilst maintaining the following environment objectives:

- Ensure our Environmental Management System fulfils the guidelines of ISO 14001:2015;
- Take appropriate measures to eliminate or minimize environmental impact or harm as a result of our operations;
- The company owned or operated vessels shall comply with MARPOL Regulations or in accordance with relevant statutory and company requirements;
- All personnel shall adhere to local waste safeguards against all environmental risks identified by us and our customers;
- Conduct all emergency drills as per best industry practices and standards, thereby maintaining a robust emergency response plan;
- Maintain accurate and timely records of bunkers, waste disposal, drills and any environmental incidents;
- All personnel to adhere to all of the company's environmental management procedures with a focus on continual improvement.

These company objectives are for the integrity of the environments in which we operate and all personnel shall adhere to them at all times.
